Scoring directions for the “Family Empowerment Scale”:

Scores for the subscales are simple means. Calculate the mean by adding the scores for the subscale items, and dividing by the number of questions. If there are missing items (up to 3), then add the scores for the subscale items, and divide by the number of answered questions. You can add all subscales for an overall score, but be aware that each of the subscales addresses quite different topics. Many published articles have employed this method (adding for an overall score). Examining each subscale score in relation to other variables of interest is another approach that may give more specific information.
**FAMILY EMPOWERMENT SCALE**

These questions ask about several areas of your life—your family, your child’s services, and your community. The questions include many different activities that parents may or may not do. For questions that do not apply to you, please answer “Never”. Also, we know that other people may be involved in caring for and making decisions about your child, but please answer the questions by thinking of your own situation. Feel free to write any additional comments at the end.

### ABOUT YOUR FAMILY...
